PROFESSIONAL SUMMARY

Recent User Experience Design graduate from St. Edward's University with experience designing AI-powered, web, and mobile experiences. Skilled in user research, wireframing, prototyping, usability testing, conversational UX, accessibility, and stakeholder collaboration. Combines UX design experience with a technical background in HTML, CSS, JavaScript, and computer science coursework to create intuitive, user-centered digital experiences.

SKILLS

UX & Product Design: User Research, User Interviews, Persona Development, User Journey Mapping, Information Architecture, Wireframing, Prototyping, Usability Testing, Accessibility, Design Thinking

AI & Conversational UX: Conversational Design, Prompt Engineering, Conversation Flows, Logic-Based Decision Trees, AI Testing & Iteration, Knowledge Base Development

Design Tools: Figma, Miro, Adobe Creative Suite, BoodleBox AI

Development: HTML, CSS, JavaScript

UX EXPERIENCE

UX Designer — Thiago AI

St. Edward's University | Austin, TX | 2026

- Designed and developed Thiago AI, an AI-powered student engagement assistant using BoodleBox.
- Collaborated directly with university stakeholders to gather requirements, collect feedback, and translate student and university needs into design decisions.
- Designed conversation flows, user journeys, and logic-based decision pathways to help students discover clubs, organizations, events, and campus resources.
- Developed and refined the chatbot knowledge base and AI responses through prompt engineering, testing, and iterative feedback.
- Conducted user-focused research to identify student needs and improve the accessibility and usability of campus information.

- Evaluated chatbot responses and conversation pathways, identifying usability issues and refining the experience through iterative testing.

SELECTED UX PROJECTS

Mental Health Support Chatbot

UX Design Project | Figma

- Designed a conversational experience to help college students navigate anxiety, ADHD, stress, motivation, coping strategies, and campus support resources.
- Developed user flows, wireframes, conversation pathways, and high-fidelity interactive prototypes in Figma.
- Applied conversational UX principles to simplify resource discovery and guide users through different support options.
- Incorporated accessibility considerations throughout the interface and conversation experience to support diverse user needs.

Mood Tracker Mobile Application

UX Design Project | Figma

- Designed a mobile application that allows users to record moods, recognize emotional patterns, and monitor personal well-being over time.
- Conducted user research and translated findings into user flows, wireframes, and interactive prototypes.
- Designed intuitive navigation and user interactions with an emphasis on simplicity, engagement, and usability.
- Created data visualization concepts to help users understand mood patterns and trends over time.

ADDITIONAL EXPERIENCE

Freight Associate

The Home Depot | Austin, TX | 2021 – Present

- Collaborate with team members in a fast-paced environment to coordinate inventory movement, organization, and daily operational priorities.
- Apply communication, organization, and problem-solving skills while assisting customers and supporting multiple departments.

Volunteer Classroom Assistant

St. Martin de Porres Academy

- Supported teachers, students, and educational programs while helping maintain an organized and productive classroom environment.

EDUCATION**St. Edward's University****Bachelor of Arts in User Experience Design**

Austin, TX | May 2026

Additional Academic Background: Computer Science coursework
